

Abdel Rahman El Kouche

Agentic AI Engineer

Paris, France | abdelrahmanelkouche@gmail.com | +33 7 43 99 10 27

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

AI engineer building agentic LLM systems and production ML: multi-agent pipelines, QLoRA fine-tuned models on Kubernetes, automation that moved a live business metric. Seeking an Agentic AI Engineer or Forward Deployed Engineer role.

EDUCATION

CentraleSupélec, Paris-Saclay, Paris, France Sep 2026 - Present

MSc in Artificial Intelligence Applied to Society, specialization in Agentic AI Engineering

American University of Beirut (AUB), Beirut, Lebanon Sep 2022 - Jun 2026

B.E. in Computer and Communications Engineering, specialization in Machine Learning and AI | GPA: 3.72/4.0

EXPERIENCE

Maids.cc, Beirut, Lebanon (Remote) Aug 2026 - Oct 2026

AI Business Analyst

- Lead a customer-retention initiative built on **automated personalized outreach**, raising the customer return rate from **43% to 48%** in **5 weeks** after it had held flat for the prior 2 months.
- Restructure the company-wide **customer service function** for part-time staff, standardizing response workflows and **escalation paths**.

CME Offshore, Beirut, Lebanon Jul 2025 - Aug 2025

Backend Development Intern

- Built the complete backend for a Lebanese healthcare booking platform in **.NET 9 (C#)** and **PostgreSQL**, using an MVC architecture and **stored procedures** with no ORM to keep SQL logic explicit and maintainable.
- Developed and tested **15+ REST endpoints** covering **JWT authentication**, **OTP verification** with salting, and SMTP password recovery, and designed the relational schema end to end.
- Wrote **80+ xUnit test cases**, **led backend testing** across a 4-person team, and presented the product to a company jury.

Inmind.ai, Beirut, Lebanon Feb 2025 - Mar 2025

Backend Training Program

- Completed a hands-on backend program covering **.NET Core**, REST APIs, **Keycloak** authentication, **Hangfire** background jobs, and **Docker** containerization, with exposure to Angular and Node.js.
- Applied **Domain-Driven Design** principles and Git-based workflows across all program deliverables.

American University of Beirut, Beirut, Lebanon Jan 2025 - Jun 2026

Tutor, Introduction to Programming

- Tutored undergraduate students in foundational programming concepts, **algorithms**, and **problem decomposition**.

PROJECTS

Verdict | Python, PostgreSQL, Kubernetes, PyTorch | Team of 3 Apr 2026 - May 2026

- Built an **agentic contract-review platform** that turns uploaded PDFs into **clause-level risk findings** with evidence anchors and mandatory human approval, processing a full contract in **roughly 5 minutes**.
- Orchestrated **10 agents** in a **run-based pipeline**: retrieval agents surface evidence, risk agents classify clauses, and an admin agent merges findings into an auditable final review.
- Fine-tuned a **Gemma 26B** risk classifier with **QLoRA** on **12K CUAD/MAUD clauses** via DeepSeek distillation, deploying it on a single H100 pod through **Kubernetes** with an MLOps pipeline for evaluation and release automation.

Unicode | Python | Solo Mar 2026 - May 2026

- Architected a **multi-agent CLI** coordinating **Claude**, **Codex**, and **Qwen** to automate end-to-end software engineering workflows; **won the AUB hackathon against 20 teams** with a solo entry built entirely through Unicode.
- Engineered a **3-tier fault-tolerant fallback chain** (Claude, Codex, Qwen) with parallel execution, automatic Git integration, and **persistent cross-session memory**, backed by a **CI/CD pipeline** with automated linting.

Nomada | Python, Flask, React, PostgreSQL, Docker | Team of 2 Aug 2025 - Dec 2025

- Developed an **LLM booking agent** that handles flights, hotels, and multi-step reservations end to end through natural language, using prompt engineering and JSON-based state management, reaching **91% accuracy** on intent and slot extraction.
- Built a **React frontend** and **Flask REST API** connecting the agent to PostgreSQL for users, bookings, and payments, with payment gateway integration and automated backups, containerized with **Docker**.

Lungify | Python, PyTorch, Flask, React, Docker | Team of 3 Mar 2025 - Apr 2025

- Trained a **ResNet18** classifier (11.7M parameters) to label chest X-rays as Normal, Pneumonia, Tuberculosis, or Unknown, reaching **99.65% accuracy** and a **0.9965 weighted F1** on a 1,726-image held-out test set.
- Built the preprocessing pipeline across **3 merged public datasets** (CLAHE, window-level contrast adjustment, 512x512 normalization) and shipped the model as a **Dockerized Flask and React app** with confidence scores, region heatmaps, and a **Gemini-based second-opinion check**.

SKILLS

Languages & Frameworks: Python, C# / .NET, Java, C++, SQL, PyTorch, React, Flask, Docker, Kubernetes, Git

AI & ML: LLM orchestration, multi-agent systems, prompt engineering, QLoRA fine-tuning, deep learning, RAG, MLOps, CI/CD

Languages: Arabic (native), French (bilingual), English (fluent), Spanish (beginner)
